## Data Network Specialist/Architect

### Are you Accenture's new Datacenter Network Architect/Specialist?

Accenture is looking for a high skilled Datacenter Network & Communication architect/specialist with a commercial mindset to join our Infrastructure team located in Gelsted on Funen and in Kolding. You will be a part of a professional team of network/communication Solutions Specialists. The infrastructure team consists of highly engaged professionals located in Denmark and in our Delivery Centre in India. As a part of the local team you will get the responsibility of design and selling new ideas and projects in our large scale infrastructure environment. This position is client facing and you are expected to manage a good long term relationship with our customer. Act professional and with focused quality in every way through our proven processes.

### Your Colleagues and Career Opportunities

The team in Denmark consists of Solutions Specialists who work mainly within projects and with 3rd level support. You will be the initiator or those projects in interaction with the Solutions Specialists and the Customer. The team has the responsibility for a wide range of infrastructure areas, examples are: LAN, WAN, Network Security, IP Telephony, Lync and Data Center services incl. Facility. You are expected to have high level architectural/specialist knowledge within Datacenter Network as well as good knowledge on the other areas.

Your main focus will be to continually develop the Datacenter infrastructure and the operations with new technologies and workflows that support a cost-effective operation for our customer.

Our Services workforce is a dedicated team of people who work on outsourcing engagements. The partnership that you will be part of is a long-term partnership which includes Service Management, Application Outsourcing and Infrastructure Outsourcing. We not only maintain key business functions for our client, we constantly seek to improve them to help our client's develop their IT. We leverage on our global network and combine our expertise in Funen and Jutland with experts from all over the world.

### Key responsibilities include

- Be a trusted and innovative partner with our Customer
- 'End to end' delivery responsibility - across onsite and offshore staffing
- Developing new Datacenter infrastructure improvement-design and -projects
- Prioritizing and ensuring deliverables according to client priorities - in close cooperation with our offshore resources
- Drive discussions with clients on design and strategies within infrastructure, ownership of workshops and develop business cases
- Drive continuous improvements and innovation towards the client
- Assist in troubleshooting when needed

### Investing in you & Balancing your priorities

Accenture is a leading global professional services company, providing a broad range of services and solutions in strategy, consulting, digital, technology and operations. Combining unmatched experience and specialized skills across more than 40 industries and all business functions—underpinned by the world's largest delivery network—Accenture works at the intersection of business and technology to help clients improve their performance and create sustainable value for their stakeholders. With approximately 373,000 people serving clients in more than 120 countries, Accenture drives innovation to improve the way the world works and lives. ### Qualifications

- Skilled within Cisco Technologies L2/L3, NEXUS, Catalyst.
- Knowledge on F5 NLB, SDN/ACI.
- You build relationships and have experience in managing and maintaining client relationships
- You are used to show results through your architectural skills
- You are familiar with Network and Telephony technologies
- You have a relevant educational background and training – and also previous worked "hands-on" so you also can design upon own experience
- You have architectural experience from a large scale infrastructure environment
- You have excellent Danish and English skills - in writing as well as spoken. You communicate on a high level with technical staff, customers and decision makers.
- You can convey your messages, also into presentations when needed
- You can overview of very complex setup both technical and organizational
- You have a positive mindset and are trustworthy
- You are willing to go "the extra mile" for the Customer

You are fluent in English and one of the Scandinavian languages – Danish, Swedish or Norwegian

Our employees are our most important asset. At Accenture we believe that quality comes from within and we invest heavily in developing your professional competencies.

### Investing in you

You will receive on-going training that builds and extends your skills on a continuous basis, allowing you to develop tailored expertise quickly. You will have direct access to state-of-the-art technologies, tools and developer kits from all the major hardware and software houses, keeping you on cutting-edge of your area of expertise.

You will receive your own career counselor who interacts with you on a regular basis, ensuring you a career path that suits your needs and ambitions.
