Digital Integration Delivery Lead

Digital Technology Integration (DTI) is a practice area in Products Client Service Group specialising in integrating digital technology into clients' IT ecosystems to drive successful digital transformations. Digital solutions such as e-commerce, Analytics and Master Data Management demand its own set of experiences and so does successful integration into business and IT context. DTI works with our digital management consulting practice, Digital Customer, and Accenture Digital to architect, design and deliver end-to-end digital solutions for top performing international clients across a wide range of industry groups including Retail, Consumer Goods and Services, Life Sciences, Automotive, Industrial, Infrastructure and Travel.

As DTI delivery lead you take end-to-end responsibility for delivery of projects or programmes integrating digital technology into clients' business organization and IT system landscape. You have excellent teaming and coordination skills to work with client's business and IT management and architects and have the seniority and people management skills to lead Accenture cross-functional teams, typically with a substantial offshore component. You have experience from delivery of one or more digital solution types and have a proven record of accomplishments in complex business and IT project
As an experienced developer in our Application Development group, your focus will be on technical roles developing and testing mission critical enterprise solutions.

What's in it for you?

The opportunity to work with one of the world's leading consultancy firms, ranked by Gartner and Forrester Research as market leader in supporting businesses in the digital domain.

The opportunity to be part of one of the most rapidly growing practice areas in Accenture

The opportunity to shape and lead a world-class consulting team and work with big international client organisations in the Products industry segment. This role will involve working with cross-functional Accenture teams, as well as client representatives.

What we're looking for
You have experience with Digital technology and a proven track record in complex project delivery bringing you in a position to quickly earn certification as Accenture delivery lead.

As an Accenture delivery lead you have the following overall responsibility areas:

- Work with solution architects to establish a sellable and deliverable solution plan, including blueprint for solution architecture, work effort estimates, resource plan, delivery approach, delivery schedule, and project governance/ organisation

- Work with contract management to translate project solution plan into contractual language
- Staff and mobilise Accenture delivery team and work with client business and IT leads to ensure right staffing on client's roles
- Establish project governance and organisation in collaboration with client management, e.g. steering group, reference groups, reporting lines, status meeting structure etc.
- Provide guidance to client and Accenture architects, delivery team leads and staff
- Oversee all aspects of project execution, including delivery of contractual obligations, client relationship management, people management, dependency management, risk and issue management, quality assurance and project financials
- Reporting to Accenture leadership
- Compliance with Accenture delivery standards and policies

Preferred Qualifications
- Experience of shaping and running digital technology programs in the industry
- Experience working for or consulting to a fundamental digital business
- Ability to build and maintain relationships with IT and business managers and executives across the client organization
- Providing consultancy, ideas and knowledge to assist clients with their digital visions, strategies and roadmaps
- Knowledge of and interest in one or more digital solution types, e.g. e-Commerce, Analytics, and Master Data Management
- Developing compelling business propositions that meet commercial requirements
- Estimation and planning - including estimates, release plans, staffing plan, assumptions, and risks based on documented scope and a set of dependencies

Strong merit if you have experience from one or more of the following systems/applications: Adobe, Hybris, Informatica or product information management systems

General requirements
- Strong interpersonal skills
- Leadership skills - setting direction, team leadership
- Well-developed business acumen
- Strong problem solving skills

Fluency in written and spoken English is mandatory.
