High performance. Delivered.

System Integration Delivery Lead

PPSIM (Program, Project and Services Integration Management) domain is comprised of project and program management professionals within Accenture that are passionate in helping clients create high performing, predictable and cost effective programme delivery and service delivery capabilities.

We help clients ensure that programme delivery and service delivery is tied to the future needs of their business and that they have robust and flexible process capable of adapting to rapid change. PPSIM comprises methodology, processes tools and highly skilled to help clients manage high performing programme and service environments.

Together with design, we build and operate these environments or we can provide consulting services to help clients build these services in house. We can deploy small numbers of highly experienced PPSIM staff to work alongside client staff in interim management type positions or we deploy teams focused on achieving a set of business outcomes. We can be very flexible in the services we provide and the scale and scope of our commitments.

We help our clients to align programme delivery and service delivery to IT strategy. We help our clients to manage large-scale change at speed, cost effectively and reliably. We also help our clients to build and manage service environments consistent with the operational needs of their business

What's in it for you?

An Overall Delivery Lead works closely with the end customer and our Accenture teams with responsibility for leading the delivery of the technology work.

The Delivery Lead is empowered to make decisions and is responsible for drawing upon other appropriate resources within Accenture to support delivery and to resolve any identified issues.

The Delivery Lead is also the main responsible for delivering the contracted solution at the agreed terms, cost, schedule and quality level.

What we're looking for

As an Accenture System Integration delivery lead you will have the following overall responsibility areas:

- Build ongoing relationship with the client and generate follow-on opportunities.
- Lead the delivery of technology work, with primary accountability for delivering the contracted solution at the agreed terms, cost, schedule and quality level
- Control program scope & validate work estimates to ensure we have the right foundation for delivering and managing the work
- Drive industrialisation using Accenture's standard framework for building and delivering reliable solutions and services quickly and collaboratively, industrializing delivery to support the journey to high performance.
- Mobilise the right Delivery Team leveraging the appropriate mix of delivery locations and workforces, identifying & procuring appropriate specialists and other resources
- Coordinate closely with the Accenture Account Lead to manage both delivery and opportunity areas
- Take ownership for resolving issues and mitigating risk together with Accenture management team when needed

Preferred Qualifications

- Experience of shaping and running Business Transformation Technology Programs
- Ability to build and maintain relationships with IT and business managers and executives across the client organization
- Providing consultancy, ideas and knowledge to assist clients with their visions, strategies and roadmaps
- Developing compelling business propositions that meet commercial requirements
- Estimation and planning - including estimates, release plans, staffing plan, assumptions, and risks based on documented scope and a set of dependencies

General requirements

- Strong interpersonal skills
- Leadership skills - setting direction, team leadership
- Well-developed business acumen
- Strong problem solving skills

Fluency in written and spoken English is mandatory.
