Master Data Manager - Milestone Systems

Securing the single version of truth about Milestone Company data

Start-up mentality, solid knowledge of IT Operations and People Management skills

We are a fast growing company with big ambitions. The entrepreneurial spirit that founded the company can still be seen and felt, even though today we're a global player in the surveillance industry. We're headquartered just outside of Copenhagen, Denmark and we have offices in more than 20 countries.

For our application and project department within the Global IT and operations department in Brøndby we are looking for a dedicated Master Data manager. The department is responsible for project execution, customization and maintenance of e.g. Navision. As Master Data manager you will be part of a dynamic and quality-conscious team with a very broad interface towards our business in order to create and manage a master data management process. You will get to work with highly skilled colleagues in an internationally change oriented organization.

Master Data Manager's responsibilities

- Establish a solid master data governance within Milestone
- Get and maintain the overview of data flows in Milestone
- Ownership of the integrity of data in our different systems
- Clarifying data structure requirements together with stakeholders
- Prioritizing the efforts needed in order to maintain integrity
- Gatekeeper towards data integrity when doing changes
- Holding data owners accountable for the ownership and responsibilities
- Ensuring alignment and roll-out across applications and platforms.
- Drive optimization activities/projects related to master data

Structured and customer focused

We are looking for candidates who hold a Master's degree in a related discipline. We expect some years of related work experience from a similar position. On the technical side you preferable have a good understanding of data structures and insight into relevant tools.

About Milestone Systems

Founded in 1998, Milestone Systems is a world-leading provider of open platform IP video management software (VMS) with headquarters in Copenhagen, Denmark. Our objective is to improve our clients' organizational processes and increase overall security through the management and distribution of digital video data. Since 2014 a stand-alone company in Canon Group. Milestone technology is easy to manage, reliable and proven in thousands of customer installations, providing flexible choices in network hardware and integrations with other systems. Sold through partners in more than 100 countries, Milestone solutions help organizations to manage risks, protect people and assets, optimize processes and reduce costs.

We call ourselves the open platform company. That stands for three things: open platform technology, an open business model and an open company culture. Our video management software (VMS) solutions are designed with an open architecture which allows for easy integration with other security and business systems. Yet open platform encompasses so much more. It also represents an open business model with an extensive technology and channel partner network, where everyone benefits from stronger innovation and value creation for our end-customers. Our open company culture is a foundation for how we collaborate internally and conduct business and share expertise and knowledge with partners and customers.

We are a fast growing company with big ambitions. The entrepreneurial spirit that founded the company can still be seen and felt, even though today we're a global player in the surveillance industry. We're headquartered just outside of Copenhagen, Denmark and we have offices in more than 20 countries. We offer a flexible work environment where our employees get to define their workday and have a great deal of influence over how they use their time. We work hard, set our ambitions high and celebrate our successes together.

You have strong organizational skills with the ability to keep multiple streams of work moving across people and departments as well as proven people skills, since communication, collaboration, patience and tact is needed.

You can work autonomously creating and tracking progress in a fast paced environment and are comfortable juggling and coordinating multiple projects across several key channels simultaneously.

You need to recognize yourself in the below description:

- Experienced with best-practices in the area of master data management
- Preferably with experience in process optimization across different platforms
- Preferably with experience in compliance and related areas
- Quality-driven - getting to the result without being unnecessarily rigid
- Can handle many changes and moving targets
- Ability to navigate through many different priorities
- Excellent personnel handling skills as well as the understanding of different cultures across borders
- Ability to set the bar high and achieve it, but also to make the right compromise at the right time
- You are structured, methodical and organized and thrive in a changeable environment
- You possess excellent English skills both orally and in writing

Join a great team

The team is currently small and placed under Global IT and operations; Business Support. The team is responsible for different tasks under the broad hat of project management, system ownership and master data management.

The environment is agile in the planning and execution of projects, as priorities may change.
