## Sitecore Developer/Architect

At Avanade, business and technology consulting isn't just your career...it's your passion. That means more than just working with new innovations. It means using technology to solve business problems in ways that make a real difference to you, your customers, and the world. At Avanade, we:

- Are passionate about pushing the limits of Microsoft technologies to help our customers achieve their goals and deliver real business solutions
- Thrive on open dialogue and debate. We share best practices and solve problems through teamwork. You will be collaborating with a highly skilled network of colleagues both globally and on a Nordic level.
- Are committed to growth – both as an organization and as individuals. You will get the advanced training you need to be successful, along with the time and opportunity to apply it. Additionally, you will receive a personal career manager who will coach and assist you in reaching your professional goals.

In Avanade you will become part of a skilled and result driven team and you will be able to work on highly complex projects. We are a Global company with large Global projects enabling you to become a part of a unique team and honer your technical and consulting skills by participating in large complex projects and benefiting from the vast knowledge of your teammates.

In Avanade we believe that the technical skills of our employees are extremely important to be the market leader and therefore we offer a minimum of 80 hours of training every year. Since knowledge sharing is important for us we have developed Global online communities where you can get in touch and share knowledge with other experts across the world. We also have a strong focus on career development and have numerous courses available.

You will be responsible for the design and implementation of custom components and applications using the latest versions of the Sitecore, .NET Framework, ASP.NET, C#, Visual Studio, Windows Azure and other advanced components of Microsoft technology. More often than not, this will happen using an agile methodology like Scrum.

As you grow your career at Avanade, you will build management, technical and planning skills. You will improve your abilities to think creatively, design solutions, and interact with customers as well as learning how to take roles as development lead or technical architect on large projects.

### Roles and Responsibility

Avanade Denmark is looking to hire an experienced .NET Sitecore Consultant. This is an exciting opportunity for the right individual to join the market leader in the delivery of enterprise scale Microsoft solutions, help our customers drive value through innovation, and be part of our success story.

Our consultants contribute to the full software development lifecycle; from bids for work, workshops, business requirements gathering, functional and technical design, coding and testing of software applications to meet technical and business requirements.

We're looking for experienced consultants with deep technical development experience in the .NET framework, C#, ASP.NET and SQL Server preferable Sitecore or equivalent CMS knowledge with experience in customer facing web sites or e-commerce applications.

- Solid knowledge about the Sitecore Platform, EPI server or similar CMS / Digital Marketing product
- Certified in Sitecore
- + 2 years experience as .NET framework consultant at customer site or similar
- Past experience in e-Commerce and CMS projects
- Development experience in for example C#, ASP.NET,HTML,CSS, javascript,SQL Server
- Driven by a strong interest in a broad range of web and web-related technologies including Social Media.
- Degree/Diploma in Information Technology or equivalent.

### Minimum requirements

To be successful in the position, you should be able to recognize yourself as having:

- Passion for technology and a drive to learn new things continuously
- Strong problem-solving skills and proven ability to analyze situations logically, identify critical issues and recommend solutions to meet customer's needs
- Experience in developing technical requirements based on business imperatives
- Ability to self-manage - you should be self-driven, demonstrate high levels of initiative and be able to work effectively in a high pressure and high pace environment
- Fluency in spoken Danish and English
