EFFICIENCY WINS.

Head of Global IT Infrastructure

About Nexperia

We at Nexperia are the efficiency semiconductor company. We deliver over 70 billion products a year and as such service thousands of global customers, both directly and through our extensive network of channel partners. We are at the heart of billions of electronic devices in the Automotive, Mobile, Industrial, Consumer, Computing, and Communication Infrastructure segments.

There are not many companies around that have the (in house) supply chain manufacturing capability, logistical savviness and processes in place to pull this off. It has made us a leader in Small Signal Discretes, Logic and PowerMos semiconductor products. At Nexperia we believe that an efficient company creates efficient products. Products that are efficient in power consumption and efficient in space usage by offering industry leading small packages. All of this complemented with best in class quality levels and an extensive portfolio that meet the stringent requirements set by the Automotive industry.

Led by our lean and passionate team, we are teaming up with our customers, partners and with the communities in which we have 11,000 employees to create the best standard semiconductor components available in the market. It's a team effort. We call it: TeamNexperia. And it is about doing things together. Join us as we build a new company with decades of experience combined with the passion of the new generation.

Your responsibilities

- This role is responsible for the Infrastructure & Operations (I&O) function throughout Nexperia. This includes data center infrastructure, data center applications, network administration, network engineering, client environment engineering, and tier 2 and 3 support.
- Provide leadership for delivery of 24/7 service operations and KPI compliance. Establish metrics, key performance indicators, and service level agreements to continually improve the performance of IT operations.
- Lead global, strategic technology initiatives to build and maintain key elements of the firm's enterprise infrastructure and associated project portfolio, including but not limited to 24x7 data
- In conjunction with the Office of the CIO, establish and maintain strong, strategic partnerships with vendors and service suppliers.
- Coordinate I&O projects/resources with the IT project management office (PMO). Ensure all project deliverables, budgets, and timelines are met.

Candidate Profile

- Extensive knowledge of data center operations, telecommunications, network engineering, data center applications, client/server computing and production operations support
- Strong leadership and management abilities. Ability to lead cross functional project teams in implementing projects of a complex nature.

- Persuasive, professional communication style. Capable of communicating complex, technical topics to a wide variety of audiences. Ability to interact with senior management and influence decision makers
- Ability to see the "big picture" across such areas as private and public hosted infrastructure and services, identity management, security, telecommunications, enterprise storage and big data opportunities, end user experience, and training/education

Candidate requirements

- Bachelor's/Master degree in IT, Business Management, Computer Science, Electronics, or related field, or equivalent industry experience required.
- 10+ years of relevant IT experience in designing and deploying enterprise level network and systems infrastructure (Experience in network security and/or development of IT Technical Architecture plans will be an added advantage)
- Experience/Knowledge in the following is crucial to be successful in this position;
    - Wide Area Network connectivity and topologies
    - VoIP Technologies
    - Local Area Network including wireless
    - Network Security and IT Infrastructure Security
    - Network-based systems (e.g. DHCP, DNS, NTP, IP-Telephony systems)
    - Structured IT cabling infrastructure
- Great understanding of architecture and reference models such as TOGAF, SID, TAM, SOA.
- ITIL knowledge, ITIL v3 certification is a plus and Prince2 or PMI certification a plus
- Experience with outsourcing of IT services, RFP execution, vendor selection
- Excellent technical documentation skills (such as designing roadmaps and developing low/high level architecture/designs)
- Proven track record in road mapping, technical architecture design, solution definition, project management/execution, change/risk management
- Persuasive mind-set and to make things happen (successfully finish projects and assignments)
- Experienced in introducing new concepts of working and Continuous drive for improvement

Preferably, location is Hamburg, Germany (Alternatively Manchester or Munich)

You must be able to communicate in German and are fluent in English

You will join a passionate team
