

Avanade is looking for a Senior Solution Infrastructure Architect

Avanade is majority owned by Accenture, and was founded in 2000 by Accenture LLP and Microsoft Corporation - and - with over 29,000 people worldwide, we are at the forefront of helping major organizations in the private and public sectors to deliver mission critical solutions

At Avanade, business and technology consulting isn't just your career - **it's your passion**. It's more than just working with new innovations. It means using technology to solve business problems in ways that inspire change and make a real difference for our clients.

Together with your colleagues, you will be working on highly complex projects for some of Denmark's most well-known companies, all while developing your own career.

As a **global organization**, we recognize and embrace the **diversity** that comes from working with people all over the world. Allowing each individual to be the best at what they do makes us better at what we do.

Avanade Denmark is seeking new colleagues for the Infrastructure Talent Community. We provide **Infrastructure and Cloud services to our enterprise level customers**.

At the heart of our business and operating models is the ability to deliver IT solutions and services to our clients and employees. That's what our Infrastructure Talent Community is all about.

The community plans, designs, builds and supports the hardware, software and network resources we need for the successful operation and management of our world-leading technology.

We develop and maintain our clients' cloud infrastructures, operating systems, networking, security, and systems management. We advise on communications systems for clients, focused mainly on Microsoft Skype technologies and implementations. Their expertise covers VOIP solutions, internet strategy, architecture, network design, implementation, upgrades, and migrations.
