High performance. Delivered.

Strategy Technology Manager

Businesses are being disrupted by new digital competition, evolving consumer demands, new emerging technologies and new regulations. The importance of technology and new agile ways of working for modern businesses is rapidly increasing and succeeding in the intersection of business and technology a must.

We are looking for a Technology Strategy Manager/Senior Manager with the right mix of strategy consulting and technology skills to help our Nordic clients develop their future position. Are you excited by the opportunity to work in technology strategy engagements for our Nordic clients to develop technology strategies and drive transformational change?

Accenture Strategy:

Strategy consulting today requires the ability to see how business, technology and operations interconnect. With a global community of 8000+ professionals, Accenture Strategy operates at the intersection of business and technology, where we help our clients to solve their toughest issues, realize their most promising opportunities, and deliver real results.

Based on an industry context, our strategy professionals partner with C-level executives to define “what,” and then bring the best of Accenture to implement “how.” Whether it’s business strategy, technology strategy or operations strategy, we drive value, shape new businesses and design operating models for the future—with the goal of helping clients identify, build and sustain the capabilities needed to differentiate themselves and outperform their competitors.

As part of our strong Nordic Strategy community, you will work with the market leading organizations in the Nordics and in the world. Being part of a global network of expertise you will have access to a truly differentiating understanding of our clients’ industries, a global perspective on progressive business ideas and emerging technologies, enabling you to identify and drive transformational change.

Role description:

As a Technology Strategy Manager you will lead Technology Strategy engagements for Nordic clients. These engagements include helping clients develop digital- and IT strategies, structure effective IT operating models, optimize value and cost efficiency of technology investments, support M&As with technology due diligence, and transform their businesses to leaders by leveraging new technology. You will be part of the Swedish Technology Strategy management team and have an active role in driving and developing the practice.

Key responsibilities:

Client Delivery and Development

- Plays a significant role in developing new technology strategy consulting opportunities with our clients, shaping proposals, and gaining client agreement to move forward
- Provides solutions to complex technology and IT problems for C-level executives where analysis of situations requires an in-depth knowledge of our clients’ strategic objectives and technology landscape
- Operationally leads strategy engagements; synthesizes numerous analytic efforts to draw meaningful conclusions, identify implications for recommendations, and achieve client buy-in
- Frequent interaction with management at client, which involves presenting analysis and recommendations, facilitating workshops, and negotiating or influencing on significant matters
- Develops and maintains strong trust-based relationships with clients

- Managing activities and deliverables against plan, reviewing draft output, and providing feedback and coaching to project team members
- Assesses and manages risks and issues, ultimately ensuring that project objectives are achieved
- Involved in setting strategic direction for technology and IT to establish near term goals for business and IT organizations

Practice Building

- Develops expertise in specific practice specialty areas to increase the breadth and depth of our knowledge base and capabilities
- Elevates our brand and presence in the marketplace (e.g. publication of thought leadership, offering development, recruiting)
- Provides coaching and mentoring to analysts and consultants as part of executing projects and in a Career Counselor capacity

Qualifications

Basic Qualifications

- 5+ years of experience from consulting at a renowned consulting firm and/or from relevant line management positions
- Proficient technology acumen and experience of technology and IT strategy and/or transformations

Professional Skill Requirements:

- Proven ability to build, manage and foster a team-oriented environment
- Proven ability to work creatively and analytically in a problem-solving environment
- Excellent communication (written and oral) and interpersonal skills, and strong executive presence
- Excellent leadership and management skills
 - Attention to detail while managing competing priorities and tight time pressures
 - Strong analytical skills
 - Ability to facilitate client meetings
 - Desire to lead and motivate teams in dynamic and challenging work environments
 - Results-oriented, self-directed, inquisitive, and entrepreneurial-minded

Particular interest for candidates with:

- Retail and Financial services industry experience
- Enterprise architecture experience
- Emerging technology experience (e.g. Robotics, Blockchain, Artificial Intelligence, Agile architectures)
- Experience of new ways of working (e.g. agile, DevOps, Design Thinking)

Education: M.Sc. in Engineering or Business Language: English and Swedish
